

X-Sendfile

“X-Accel-Redirect” - Header

(Nginx)

vhost.conf

```
location /projectfiles/ {  
    internal;  
    root /var/project/;  
}
```

view.py

```
def sendfile(path)  
    response = HttpResponse()  
    response['X-Accel-Redirect'] = path  
    return response
```

Content-Disposition Header

<http://www.w3.org/Protocols/rfc2616/rfc2616-sec19.html#sec19.5.1>

19.5.1 Content-Disposition

The Content-Disposition response-header field has been proposed as a means for the origin server to suggest a default filename if the user requests that the content is saved to a file. This usage is derived from the definition of Content-Disposition in RFC 1806

Content-Disposition Header

```
def sendfile(path)
    response = HttpResponse()
    response['X-Accel-Redirect'] = path
    head, filename = os.path.split(path)
    response['Content-Disposition'] = "attachment; filename=%s" % filename
    return response
```
